

GOpus® PayPal Integration

Add-On for linking your PayPal account with SAP

Your request

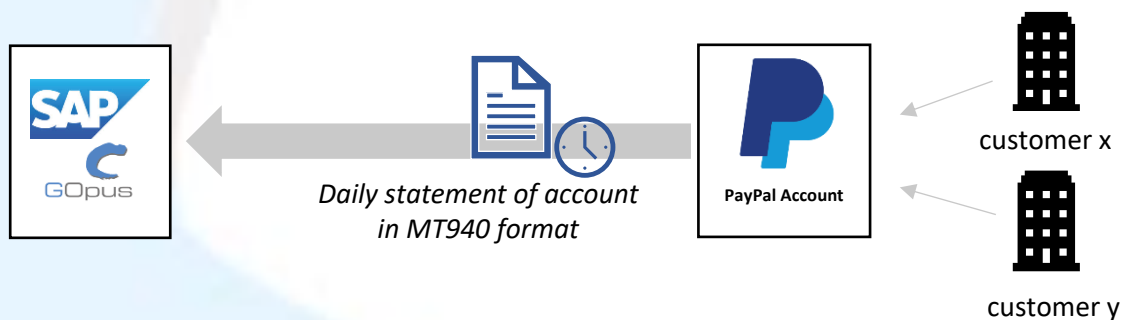

In times of increasing digitalization and the elimination of cash, not least due to the Corona pandemic, online payment services are becoming increasingly important.

The leading service provider in this sector is the US group PayPal, which, with around 300 million users in over 200 markets, makes payments in over 100 currencies possible.

Bank accounts and credit cards can be linked to the PayPal account, so that PayPal can bundle the representation of many different accounts and is becoming more and more useful in business enterprises. The coupling of PayPal to SAP is therefore an unfulfilled wish for many companies.

Our solution

Our Add-On **GOpus® PayPal Integration** connects your SAP ERP with your PayPal account manager. Our add-on solution converts the sales data from PayPal internal format into the MT940 format (MT = Message Type) to be processed by SAP. The MT940 file corresponds to an account statement in electronic form and contains all relevant information on completed bank transactions. PayPal transactions are created and retrieved daily by 12:00 noon in the leading time zone of the report window.

Your benefits

- ✓ Time saving through automated receipt of payment
- ✓ Reduction of manual activities
- ✓ Integration of PayPal into the standard payment process
- ✓ Mapping of all payment activities in one system
